Axlab OBJECT SLIDES

High-quality consumables,
CRAFTING PRECISION for efficient
and reliable laboratory workflows.

Axlab OBJECT SLIDES – CRAFTING PRECISION

Axlab OBJECT SLIDES Non-coated Item 1993-10

1 box of 100 slides, pre-cleaned, Frosted,
ground edges.

**Low-profile blade, suitable for most
of the sectioning tasks in the lab.**

Axlab OBJECT SLIDES Coated Item 1993-11

1 box of 100 slides, pre-cleaned, Frosted, ground
edges with special coating for optimal IHC usage.

**Low-profile blade, suitable for more
dense and hard tissue.**

Axlab Objectslides – Optimized for AS-410M use

What was important to us to manufacture:

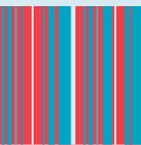

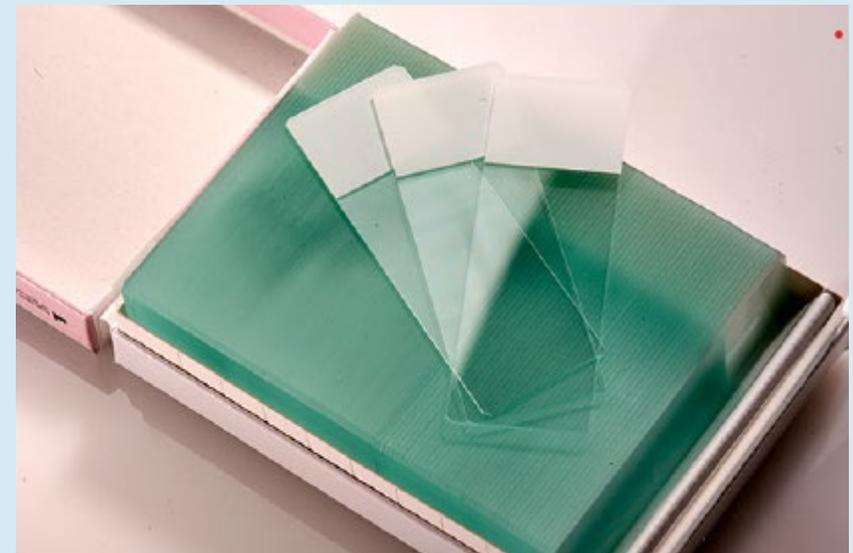

Optimized for use on AS-410M as they are Hydrophilic slides making it easier to adhere to the slide when cut on AS-410M and transferred by the carrier tape.

- Non-coated Objectslide for H&E and some Specials
- Coated Object slides for IHC and some specials

Strong adhesion to secure no tissue loss

Field for thermal print, pencil etc. (Currently only in white)

Easy to separate from each other (pre-cleaned)
